Health Requirements

Animals must conform to all imposed federal and/or state health requirements. Animals are subject to examination and must be free of visible disease. GGS reserves the right to decline acceptance to animals that would put the herd at risk. All animals coming to GGS Genetics from out-of-state are federally required to have a Certificate of Veterinary Inspection (CVI). Any out-of-state animals that are housed more than 60 will be issued a new CVI for their return trip.
